UCPath Notice: Important Tips for UCPath Upgrade

To: General UCPath Communications distribution

With the upcoming UCPath upgrade, users may need to:

- Recreate certain UCPath online bookmarks. If a previous bookmark no longer works, users can navigate back to that page and recreate it.
  - It is recommended to use the UCPath online bookmark feature vs browser bookmark
- Clear browser cache if any issues arise when first logging back into UCPath

As a reminder, for the best UCPath Online experience, please use one of the following web browsers:

- Google Chrome (Version 91)
- Firefox (Version 89)
- Microsoft Edge (Version 91)
- Safari (Version 14)

Note: Internet Explorer 11 is no longer a supported browser.

Thank you,

UCPath
