

PHASE I: AB119 System & Data Update

November 9th

Location Data will **look different** in UCPATH beginning November 9th

- Pending UCPC configuration update
- Location lookup tables will contain the new format for the location code

November 9th – December 13th

The Location Data for existing positions will be **managed centrally** by CSC during this period

- SSC Transactors will need to utilize the **default location value** that populates when the department is entered for new positions or position transfers during this period
- Reach out to kameron.johnson@ucr.edu for any departments without default values
- Updates to existing positions will be handled through a collection process between CSC and the SSCs during this period

PHASE II: AB119 Compliance Rollout

December 13th forward

The **management of location data** will be rolled out to the campus
